

# Basic Maritime Interdiction Course

## Course Overview

- At the completion of this course Participants and Teams will have the capability for rapid response to board, search, and take control of a non-compliant vessel.
- Classroom theory and knowledge is applied directly to techniques under the most realistic conditions and scenarios possible.
- Exercises are designed to test individual and collective team skills required to respond to and safely conduct a Basic Maritime Interdiction response.
- The instructors are seasoned Master Training Specialists, SEAL's with years of practical experience and training in Maritime Interdiction Operations (MIOs) and Visit Board Search and Seizure (VBSS).

## Proposed Technical Approach

A-T Solutions' facilitators present a course designed to provide law enforcement personnel with the tools and techniques necessary to identify, intercept, and safely board a non-compliant vessel at sea during daylight hours. Maritime attacks, boarding equipment and boarding procedures are covered during classroom discussions and practical exercises. Shipboard familiarization is covered as it applies to recognition of critical areas of a vessel, as well as tactical shipboard movement. The 5-day course consists of 1.5 days of classroom and 3.5 days of practical application of tactics, techniques and procedures under realistic, field exercise scenarios.

### Course Modules Include:

Introduction and Overview \* History of Maritime Shipping Attacks \* Personal Tactical Gear Floatation and Integration \* BMI Boarding Equipment \* Boarding Procedures \* Boat Assault Force Operations \* Shipboard Familiarization and Safety \* Shipboard Tactical Movement

## Estimated Costs and Deliverables
